PRIMORSKO-GORANSKA ŽUPANIJA - Općina Baška/ COUNTY OF PRIMORJE AND GORSKI KOTAR - Municipality of Baška

# OTOK/ ISLAND OF PRVIĆ

GODINA PROGLAŠENJA: 1972.  
NADMORSKA VISINA: 0 - 357 m

**FLORA:** 351 vrsta cvjetnica i papratnjača; uskolisna šašika (*Sesleria juncifolia*), alpski likovac (*Daphne alpina*), dimak (*Crepis chondrilloides*), endemične vrste modričica (*Asperula*) i druge rijetke vrste

**FAUNA:** bjeloglavi sup (*Gyps fulvus*), suri orao (*Aquila chrysaetos*), sivi sokol (*Falco peregrinus*), orao zmijar (*Circus gallicus*), sova ušara (*Bubo bubo*), kunić (*Oryctolagus cuniculus*), zelena krastača (*Bufo viridis*), mrki gušter (*Algyroides nigropunctatus*), krška gušterica (*Podarcis melisellensis fiumana*), zmija cmokrpica (*Telescopus fallax*)

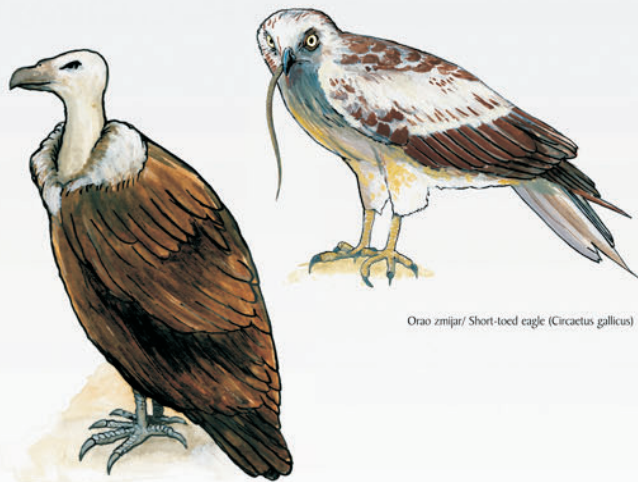

**VEGETACIJA:** kamenjarski pašnjaci, vegetacija stijena i točila, nitrofilne i halofine zajednice

**POSEBNE ZANIMLJIVOSTI:** Mnoge prirodoslovne osobitosti, a posebno rijedak biljni i životinjski svijet te ornitogene i halofilne biocenoze na liticama kakve ne nalazimo ni na jednom drugom mjestu na Jadranu. Flora i fauna, ali i neobičan, gotovo nestvaran i naizgled pusti, orkanskom burom i posolicom šibani kameniti krajobraz ovog nenastanjenog otoka razlogom su njegovog proglašenja posebnim rezervatom.

YEAR OF PROCLAMATION: 1972  
ALTITUDE: 0 - 357 m

**FLORA:** 351 species of flowering plants and ferns; narrow-leaved moor grass (*Sesleria juncifolia*), alpine daphne (*Daphne alpina*), hawksbeard (*Crepis chondrilloides*), some endemic woodruff species (*Asperula*) and other rare species

Bjeloglavi sup/ Eurasian griffon vulture (*Gyps fulvus*)

Orao zmijar/ Short-toed eagle (*Circus gallicus*)

## KATEGORIJA ZAŠTITE:

posebni rezervat; botaničko-ornitološki;  
POVRŠINA: 7.000 ha (dio obuhvaća okolni akvatorij);  
POLOŽAJ: na području Općine Baška (otok Krk)

CATEGORY OF PROTECTION: special reserve;  
botanical-ornithologica; AREA: 7.000 ha (part of the  
surface comprises the surrounding waters); LOCATION:  
area of the Municipality of Baška (island of Krk)

Pogled na jugozapadnu stranu otoka Prvića/ View of the south-western part of the island of Prvić

**FAUNA:** Eurasian griffon vulture (*Gyps fulvus*), golden eagle (*Aquila chrysaetos*), peregrine falcon (*Falco peregrinus*), short-toed eagle (*Circus gallicus*), eagle owl (*Bubo bubo*), rabbit (*Oryctolagus cuniculus*), green toad (*Bufo viridis*), Dalmatian algyroides (*Algyroides nigropunctatus*), Dalmatian wall lizard (*Podarcis melisellensis fiumana*), cat snake (*Telescopus fallax*)

**VEGETATION:** rocky pastures, vegetation of rocks and screes, nitrophile and halophile communities

**SPECIAL FEATURES:** Many special natural features, especially the rare flora and fauna and ornithogenic as well as halophile biocenoze on the cliffs which cannot be found in any other place on the Adriatic. Flora and fauna, and also the unusual, almost unreal and seemingly deserted rocky landscape of this uninhabited island battered by waves of salty seawater and heavy gusts of the bura wind are the reasons for its proclamation as a special reserve.

## POSEBNI REZERVAT

**UIPOZORENJE:** Zbog teške pristupačnosti, nepovoljnih maritimnih svojstava (senjska bura!), strmih obala i otežanog sidrenja do danas se u posebnom rezervatu uspio sačuvati osebujan biljni i životinjski svijet kao i arhaičnost krajobraza. Molimo Vas da svojim aktivnostima ni na koji način ne ugrožavate prirodne vrijednosti u posebnom rezervatu, a posebno njegovu floru i faunu.

Molimo da ne uznemiravate gnijezdeće supove glisiranjem, vikanjem ili pljeskanjem. Čuvajte bogatstva podmorja u zaštićenom akvatoriju oko otoka Prvića.

## SPECIAL RESERVE

**WARNING:** Due to its difficult accessibility, unfavourable maritime characteristics (the notorious wind from Senj), steep coastline and difficult anchorage, some unique flora and fauna as well as archaic characteristics of the landscape have been preserved up to the present day in this special reserve. Please make sure none of your activities endanger the reserve's nature, especially its flora and fauna.

Please do not disturb the nesting griffons by going too close with speedboats, shouting or hand-clapping. Please help us preserve the submarine diversity of the protected waters around the island of Prvić.

## OTOK PRVIĆ

Prvić je otok neobičnih, gotovo gorskih obilježja s mnogo strmih litica, usjeklina i klisura, iako se uzdiže tek 357 metara iznad mora. Velika ogoljelost, ispranost tla, stjenovitost, okomite litice, izloženost buri i posolici te stanovite prirodoslovne neobičnosti čine otok Prvić prirodoslovno iznimno zanimljivim. Posebnosti otoka Prvića možemo doživjeti već u podmorju, gdje se susrećemo s atraktivnim podmorskim krajobrazima i šarolikim bogatstvom koralgenskih zajednica. Velik broj zanimljivosti sakupljen je i na kopnu otoka. Zbog njih, a prvenstveno zbog litica sjeveroistočnog dijela, na kojima gnijezde rijetke i ugrožene ptice, Prvić je zajedno s pripadajućim akvatorijem i liticama Golog otoka i Sv. Grgura proglašen posebnim botaničko-zoološkim rezervatom.

## ISLAND OF PRVIĆ

Prvić is an island of unusual, almost mountainous characteristics with many steep cliffs, cuttings and ravines, even though it rises only 357 metres above sea level. Its barren landscape, eroded soil, rocky terrain, vertical cliffs, exposure to the bura wind and salt from the sea, as well as certain natural particularities, make this island very interesting from a naturalist point of view. The peculiarities of Prvić can even be noted under the sea, where one can encounter attractive undersea landscapes and a colourful wealth of coralligenous communities. Many interesting sites are also clustered in the island's interior. Because of these, and mainly because of the cliffs in the north-eastern part, on which some rare and endangered birds nest, Prvić along with its maritime zone and the cliffs of the islands of Goli Otok and Sv. Grgur have been proclaimed a special botanical-zoological reserve.

Ne oštećujte opremu zaštićenog područja, ona služi za vašu informaciju i rekreaciju. Koristite označene staze kako bi sačuvali osjetljive biljne i životinjske vrste. Sačuvajmo prirodu zaštićenog područja i pošujmo propise koji je štite. Služba nadzora zadužena je za red u zaštićenom području.

Please do not damage any property within the protected area, it serves for your information and recreation. Use only marked hiking trails to protect fragile plant and animal species. Help preserve nature in the protected area by respecting the relevant regulations. The ranger service is in charge of maintaining order in the protected area.

## NEDOPUŠTENE AKTIVNOSTI / PROHIBITED ACTIVITIES

1. Ometati životinje / Disturbing animals 2. Oštećivati geološku baštinu / Damaging geological heritage 3. Kampirati / Camping 4. Paliti vatru / Lighting open fires 5. Stvarati buku / Making noise 6. Bacati otpad / Disposing of waste 7. Uništavati biljke i gljive / Interfering with plants or fungi
